#### **Our Company**

Provincial Controls is a leading provider of instrumentation, valves and networking & communications products and services to many different types of industries since 1986. Backed by the qualified, experienced and dedicated people we cater the need for industrial market place. We are totally committed to provide products and services that are proven reliable, on time, meets customer specifications & expectations and industry standards every single time.

Our true strength is our expertise, knowledge and experience in selecting, specifying, sourcing and supplying the right products for your applications. Our sales and applications group executes orders of any size with the same accuracy and diligence each time. We can respond to any standard and custom applications requirements based on your need by accommodating your deadlines and emergencies.

We take great pride in the way we offer solutions driven approach to the specific needs of our customers. We not only sale the products but work with our customers from “Concept to Commissioning” to apply the products correctly to their applications. Our dedicated and knowledgeable service group can also help test, commission, maintain, calibrate and repair everything we sale.

Companies are forced to run leaner in the new millennium and they rely more heavily on the expertise of their suppliers. We take that extra step making site visits and provide application assistance to assess your special needs. We make sure that our customer gets the assurance that they are dealing with the best in-class professionals.

#### **Our Quality Policy**

Quality is our top priority. Our quality statement is,

**“We will provide quality products and services to meet our customer’s requirements, on time, and at a cost that represents the highest value.”**

We have developed our own quality program that meets or exceeds our customer expectations. We are very proud of our achievement in developing, maintaining and supporting this program. Our entire team remains dedicated to this program in order to provide highest quality products and services. We are totally committed and constantly upgrading this program which enable us to serve our customers with better quality products and services.

Our quality program is integrated with every job description serving us as a constant reminder of high levels of quality our customers look for in every job that we do.

**Our Products**

We represent products from manufacturers who are innovative and true industry leaders in their respective field. Over the years we have established positive relationships with our manufacturing partners which enable us to cater our customer's need effectively. We offer the best quality products at competitive price.

We have supplied products to Petrochemical, Chemical, Oil & Gas, Power, Food, Pharmaceutical, Plastic, Brewery, Cement, Steel, Pulp & Paper, Automotive and other manufacturing industries. We supply . . .
