## PANEL DIVISION

**Our panel division is based in London, Ontario, Canada, with 25+ years experience in the control systems market. We specialize in new electrical, PLC and pneumatic panel assemblies but we can also rebuild your outdated existing equipment. We have been supplying the Petrochemical industry with hazardous location, and intrinsically safe, safety shut-down control systems for many years, and will provide you with Auto CAD drawings and training manuals of all our designed and manufactured panels and cabinets. Our 2000 sq. foot facility can handle all sizes of projects. Phone, or fax us your requirements today.**
